

Industrial Rooflights

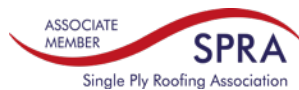

How to Reduce Expense and Risk

This CPD is an introduction to the factors that influence expense and risk when using industrial rooflights on logistics buildings, factories, and other warehousing.

It is suitable for main contractors, architects, building owners and developers working on logistics buildings, factories, and other warehousing.

Topics covered include:

- Brett Martin Group and sustainability
- Material choice and the effect on visual comfort
- System choice and how this influences speed and cost
- Vertical panel glazing
- Rooflights – safety and non-fragility
- Designed to perform – optimising rooflight design for speed and cost
- Technical support
- Warranties
