

Polycarbonate Facades

Vertical Daylighting and Architectural Features

This CPD is an introduction to sustainability and design considerations when creating a façade for vertical daylighting and presents the flexibility and freedom in design that architectural polycarbonate glazing systems can offer.

It is suitable for architects, building owners and contractors working on a variety of public and private sector and industrial buildings.

Topics covered include:

- Introduction to Brett Martin
- The Benefits of Natural Daylight
- Polycarbonate – Features and Benefits
- Façade Design Considerations
- Relevant Regulations
- Product information and applications
